

Encourage your team to take the 2019 annual team member engagement survey

The 2019 annual team member engagement survey takes place Monday, Aug. 19–Friday, Sept. 6. As we continue to move forward as one, this first-ever organization-wide survey allows you to shape the future of our health company by sharing your opinion on what’s working well and what needs improvement. All responses remain confidential.

On Monday, team members* will receive an email from Perceptyx, Inc. (customersupport@Perceptyx.com) with a link to participate online. The survey takes 15-minutes or less to complete, and progress can be saved. Team members in Nursing can expect it to take about 25-minutes to complete, as there are additional questions for this area. It can be taken while at work or home, and has been designed for both desktop and mobile devices.

As a leader:

- Encourage participation in this important effort.
- [Post this flyer in visible areas](#) for team members without regular computer access.
- Work with your team to set aside time during their shift to take the survey.
- If you have a team member whose device is not regularly connected to the Prisma Health network, [provide them with this link](#) to take the survey; they will need to log in with the username used to access their work computer.

Everyone who completes the survey is eligible to receive one of several prizes, ranging from gift cards to wearable technology and home entertainment items. Prizes have been made possible through the support of corporate partners, the use of corporate reward points and the [Purchasing Power](#) program. Team members will be contacted directly throughout the length of the survey.

Supervisors and up will be provided with a link where you can access participation rates by department once the survey is underway. Survey results will be shared with leaders this fall. Details on how to review and interpret the results will also be communicated. Leaders will be expected to discuss the results with their team and develop an action plan to address any needed changes.

** Palmetto Health-USC Medical Group team members are included.*

This information will be included in *Team Member News* on Thursday.
