

### **Epic Healthy Planet goes live on Monday, Sept. 9**

Epic Healthy Planet, Epic's population health application, will go live for Care Coordination Institute team members in Columbia and Greenville, Prisma Health Upstate Network member Self Regional Healthcare, [AccessHealth SC](#) partners and any other Prisma Health team member currently using Caradigm. Epic Healthy Planet will replace Caradigm, which will go into a read-only state.

Through its advanced workflow and reporting capabilities, Epic Healthy Planet will bring high risk managed populations to the next level of assessment and care planning. It's modular approach gives population health teams the necessary 360-degree view of the patient, which in turn improves the lives and experiences of patients.
