

### **Learning Hub will replace HealthStream this fall**

Learning Hub, Prisma Health's new online learning management system, will replace HealthStream this fall. In preparation for the launch, team members are asked to complete any assigned courses in HealthStream no later than Sunday, June 30.

After June 30, you will not have the opportunity to go back and complete your assigned learning. New required learning will not be assigned until after Learning Hub goes live.

Learning Hub will deliver online learning for all of Prisma Health through one customized system. You will be able to search and register for professional development courses, complete assigned learning activities, explore career development paths, view your Prisma Health transcript and more.

Prisma Health–Midlands began using Learning Hub earlier this year. Additional details about the launch of Learning Hub in the Upstate will be communicated soon.
