

New Vascular Lab opens at Hillcrest Hospital

Today, a new Vascular Lab opened at Prisma Health Hillcrest Hospital. The new lab, which will be open weekdays, offers a full array of new vascular lab studies including highly specialized vascular lab exams such as upper arterial, mesenteric and renal artery studies.

Having these services available in the Simpsonville community will allow our patients to receive care where they live and is part of a larger initiative to standardize services across Prisma Health.

Services also are offered at Vascular Health Alliance, Greenville Memorial Hospital, Greer Memorial Hospital, North Greenville Hospital, Laurens County Hospital and Oconee Memorial Hospital.
