

## November Safety Bulletin

### Decorating for the holidays

As Prisma Health Safety Officers approach the holidays and walk through the halls,

We endeavor to walk, inspecting the ceilings, doors and walls.

Looking for wreaths made of twigs and Santas of paper;

Don't hide them from us – we will find the caper.

Fake snow, pine cones, open (gasp!) flames:

Get rid of these things, for we will not play games!

Hang nothing from fire doors, on/near sprinklers or exits.

If you do, we will call Santa – then for you, NO candy or PRESENTS!

No real trees, no branches, no needles of pine,

Just help us out, and save all the (constructive input) whine.

If these things spark up and begin to smoke,

It'll be hard to get out, and that's no joke!

### Key points to remember

- Fire- or flameproof artificial trees are allowed w/UL label.
- Flameproof decorations with UL labels are allowed (with documentation).
- No live trees, no unauthorized lights or electrical decorations, no decorations on fire doors, cotton, paper, straw, etc., or other combustible material is allowed.
