

Report work injuries immediately

The Prisma Health [workers' compensation policy](#) has been aligned across the organization and is available on PolicyTech. As a leader, you are responsible for encouraging and assisting team members in reporting injuries and illnesses and collecting information about the incident promptly. If a team member is formally admitted to the in-patient service of a hospital or clinic as a result of a workplace incident, Occupational Safety and Health Administration requires that a report be submitted within 24-hours.

Please review the updated policy in its entirety to understand the crucial role you play in reporting incidents and preventing future occurrences. Contact [Ily Rodriguez](#) (Midlands) or [Lisa Purvis](#) (Upstate) for more information.
