

Take an Epic voyage – join the project team today!

As a reminder, the Information Technology Services (ITS) team invites all team members to consider the exciting opportunity to join the Epic Voyage Project team. Project team members will design, build, test, and maintain Epic for the Midlands in a collaborative effort with Upstate ITS team members.

- We need smart, humble, hungry team members from across the organization.
- No need for previous ITS experience.
- You will get the chance to develop highly desirable skills and obtain a valuable industry certification.

The ITS team needs to add about 25 team members right away due to the recent announcement expanding the Epic rollout enterprise wide in February 2021 (Revenue Cycle, Ancillary, Ambulatory and Acute). This project will be operationally owned and driven, but will work in partnership with ITS to maintain proper ITS level controls.

Are you interested?

Your first step is to complete an assessment focused on problem solving, analysis and logical reasoning ability. The assessment does not require familiarity with the Epic software system.

Get started now!

1. Send an email to EpicVoyage@PrismaHealth.org to schedule your assessment
2. After passing the assessment, apply to the posted position(s)
3. Complete interviews with the project director and/or managers and a peer interview

Be part of this transformational initiative at Prisma Health.
