

Upgraded policy management system rolling out organization-wide next month

On Tuesday, Oct. 1, Prisma Health will begin using PolicyTech for the housing of all policies and procedures for Prisma Health. The system will be new in the Upstate and an enhanced version in the Midlands.

What PolicyTech offers

- New system look and appearance
- Single policies and procedures documents
- Improved search engine for end users to locate policies
- Automation of policy development, revision and maintenance process
- Easy access to policies and procedures through myPal and Plexus
- Access to historical policy review and approval-related information

Training opportunities

- Team members identified as system administrators and document owners have already received training
- Training will be provided on Sept. 17 and 19 for team members that will need to write, review and approve documents within the system
- Prior to go-live, training on how to access and use the system will be available to all team members through Learning Hub (Midlands) and HealthStream (Upstate)
