

Heard About MyChart?

Here's What It Can Do for You

MyChart is an online tool that serves as a central site for your health information. When you open an account, you can view parts of your medical record, send messages to your care team and more!

Other things you can do with MyChart:

- Request appointments and view upcoming appointments
- Read visit summaries and follow-up instructions
- Submit medical questions to your doctor's office
- Review your medication list and instructions
- Request prescription refills from your doctor
- Review your child's or elderly parent's health information through a proxy account
- View billing summaries and make payments

MyChart even sends reminder emails for upcoming appointments!

Ask how to start a MyChart account today when you check out, or activate your account online at **mychart.ghs.org**. To learn more about MyChart, visit **ghs.org/mychartinfo**.
