

## MyChart: A Busy Parent's Health Helper

### Gives you easy access to your child's health information!

We know you're busy—and we want to help! MyChart is an online tool that lets you securely connect with your child's healthcare team and access your child's health information.

#### **With MyChart, you can:**

- Request appointments and view upcoming appointments
- View your child's visit summaries and follow-up instructions
- Submit medical questions to your pediatrician's office
- Review medication lists and instructions
- Request prescription refills from your child's doctor
- View your child's growth curve
- View and print a list of your child's immunizations
- View billing summaries and make payments

MyChart even sends a *reminder email* when your child has an upcoming appointment!

Parents must set up a proxy account to access their child's MyChart account. Once completed, you can view all of your child's information through your own MyChart account. If you have more than one child, you may easily switch back and forth to view all of their health information using your proxy account.

#### **How to Set Up MyChart for Your Child**

- Set up your own MyChart account at [mychart.ghs.org](http://mychart.ghs.org). You will need an activation code (you can request one on the page).
- Register each of your children for a MyChart account.
- Ask the staff at our office to set up proxy access for you.

Busy parents need a break. Let MyChart make at least one area of your life easier by managing your children's health information.
